

News Release

Local Company Saving Homeowners Thousands

July 10, 2008

Palmetto, FL –

In these economic times, many people are looking for ways to save money wherever possible. As a rule, saving money means sacrificing quality, convenience, or similar. Surprisingly, there is an exception, thanks to a law unique to Florida that requires "discounts, credits, or other rate differentials" to homeowners for providing certification of some very common (9 out of 10 homes qualify) construction features of their dwelling. These credits equate to refunds and lowered premiums which are recurring for five years. Wind Inspections, LLC, a local provider of wind mitigation inspections, has been saving customers hundreds, and often thousands of dollars in annual homeowner's insurance premiums, while lowering escrowed mortgage payments. Homeowners throughout Manatee and Sarasota counties have benefited by their ability to react quickly and thoroughly, yielding discounts three times that of the State's "MySafeFloridaHome" program.

The vast majority of homeowner's are qualified to receive these credits. Their inspectors are trained to complete the inspection documenting these features with digital photos, and completing the "Florida Uniform Mitigation Verification Inspection Form". The process is very simple and the inspection takes less than thirty minutes. The inspector then sends the documents including digital images to the homeowner's insurance agent, who files it with the insurance carrier. Upon review by the carrier, the customer is notified of their savings and in most cases refund checks and new rate endorsements are delivered within 21 to 30 days. At this point, if the customer has insurance escrowed into their payment, they are then able to call their mortgage company to request a Mortgage Analysis. Within minutes they are informed of their new lowered monthly mortgage payment.

Wind Inspections, LLC. is located in Palmetto, FL and specializes in providing professional wind mitigation inspections.
